EE215 Circuits and Systems

Lecture 15
Quiz
1) Current flowing into the dotted end of one coil will induce a voltage with positive polarity at the _______ end of the other coil.
   a) dotted   b) undotted

2) The coefficient of coupling has values between 0 and ______.
   a) 1   b) $M$
1) Current flowing into the dotted end of one coil will induce a voltage with positive polarity at the ________ end of the other coil.
   a) dotted  b) undotted

2) The coefficient of coupling has values between 0 and ______.
   a) 1  b) $M$
