1) A low-pass filter removes _______ frequencies from the input.
   a) low                         b) high

2) A particular circuit has a voltage gain of 1 V/V. The corresponding gain is dB is ____________ dB.
   a) 0                           b) 20
