Lecture 29
Quiz
1) The s-domain impedance of an inductor is ____.
   a) $sL$  
   b) $1/(sL)$

2) You can find a circuit's output by __________ the circuit input and the circuit impulse response.
   a) convolving  
   b) multiplying
1) The s-domain impedance of an inductor is ____.
   a) \( sL \)          b) \( 1/(sL) \)

2) You can find a circuit's output by __________ the circuit input and the circuit impulse response.
   a) convolving          b) multiplying
