Lecture 33
Quiz
1) MATLAB/Octave images can be completely customized through the use of image _________.
   a) handles           b) pointers

2) In addition to complex matrices, MATLAB/Octave also supports two other data structures: structs and _________.
   a) cells             b) dictionaries
1) MATLAB/Octave images can be completely customized through the use of image _______.
   a) handles    b) pointers

2) In addition to complex matrices, MATLAB/Octave also supports two other data structures: structs and _______.
   a) cells    b) dictionaries
