Lecture 6
Quiz
1) A power spectral density function has units of Watts per _________.
   (a) second  (b) Hertz

2) The thermal power delivered by a resistance $R$ to a load resistance also equal to $R$ is known as the ___________ power.
   (a) significant  (b) available
1) A power spectral density function has units of Watts per _________.

   (a) second   (b) Hertz

2) The thermal power delivered by a resistance $R$ to a load resistance also equal to $R$ is known as the ____________ power.

   (a) significant   (b) available
