ABSTRACT GUIDELINES

Abstracts should generally be between 200 and 500 words.

Do not include any author or affiliation information in any part of your abstract so that your abstract is able to receive a blind review. Please replace any references to the author or affiliation information in the abstract with underscores. (Author and affiliation information may appear in the abstract of the accepted paper.)

A supplementary document may be used to include a graph or image to clarify the nature of your work or to include limited references to indicate a basis for the work undertaken.
