

EE 210 Project Report Guidelines

Your team project report should include the following:

1. **Title Page:** This page must include the project title, the date, and the names of all team members. Your final measured capacitance should also be on the front page.
2. **Statement of the Project:** This is a concise description of the project with the specifications established by the team.
3. **Discussion:** This should include a one-to-three page summary of the work done on the project. It should include a complete schematic diagram of your capacitor, a photograph of the final product, a parts list, a discussion of the procedures used to complete the project and test the results.
4. **Results:** A summary of the project results. This should include a description of the experiment and its outcomes. Statistical differences between measurements obtained from the experiments and standard accepted values should be evaluated and discussed.
