CS 350: Computer/Human Interaction
Lecture 28 Overview

• Discuss Homework 6
• **Reminder**: Group Project due by 4:30pm
  - Implementation
  - Report
  - Peer review forms
• **Reminder**: Exam 2 on Friday, December 11, 2:45pm

CS 350: Computer/Human Interaction
Exercise 2, page 301

• Explore the buttons and menu systems of a word processor until you find an unfamiliar feature. Try out feature without referring to help until make a mistake, then try to correct it.
  - What feature did you try?
  - How did you think it work and what happened instead?
  - How could you tell you made a mistake?
  - What did you have to do to correct mistake?
  - What did you learn overall about the system?

CS 350: Computer/Human Interaction
Exercise 1, page 339

• Analyze the collaborative project you have been doing. List tasks carried out on regular basis, and roles and responsibilities of group members in each task. Describe techniques for coordinating the work, staying in touch, sharing progress or status, distributing updates or documents, etc. What are the biggest problems in coordinating the team’s work?

CS 350: Computer/Human Interaction
Exercise 1, page 360

• Critique favorite Web site for use with visual impairment. Assess with respect to:
  - font style and size
  - number and intensity of color distinctions
  - use of white space
  - visual contrast
• Respond with suggestions for redesign. Discuss the extent to which suggested changes would improve information design for general users.
