Answer the following written exercises from the end of Chapter 4 of the textbook and an additional question. When a question says “implement” just write the implementations on paper. You do not need to type the code into the computer (unless you want to, of course).

1. (6 points) Exercise 9 on page 212.
2. (2 points) Exercises 10-11 on page 212.
3. (4 points) Exercises 14-16 on page 213.
4. (4 points) Exercise 17 on page 213. Note: there is a typographical error in the strategy for (a). It should say "while i < j".
5. (4 points) Assume a vector has values {19, 13, 7, 12, 16}. Show the order of elements in the vector after each pass of the insertion sort algorithm.
