Lecture 30
Quiz
1) The frequency response of a DT system is found by evaluating the system transfer function at ______.
   a) $j \Omega$  
   b) $e^{j \Omega}$

2) The output of a stable DT system in response to an everlasting exponential input of the form $x[n] = (0.5)^n$ is $y[n] = _______.$
   a) $H(0.5) \ (0.5)^n$  
   b) $H(n) \ (0.5)^n$
1) The frequency response of a DT system is found by evaluating the system transfer function at _______.
   a) \( j \Omega \)  
   b) \( e^{j\Omega} \)

2) The output of a stable DT system in response to an everlasting exponential input of the form \( x[n] = (0.5)^n \) is \( y[n] = \) _______.
   a) \( H(0.5) (0.5)^n \)  
   b) \( H(n) (0.5)^n \)
