Welcome to the NetBurner NNDK Setup Wizard.
License Agreement

Please read the following License Agreement. You must accept the terms of this agreement before continuing with the installation.

NetBurners products both hardware and software (including tools) are not authorized for use as critical components in life support devices or systems, without the express written approval of NetBurner, Inc. prior to use. As used herein:

1. Life support devices or systems are devices or systems that (a) are intended for surgical implant into the body or (b) support or sustain life, and whose failure to perform, when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury to the user.

2. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

Do you accept this license?  
- [ ] I accept the agreement
- [ ] I do not accept the agreement
Hardware License Information

Please read and agree to the following hardware license scenarios. If you need to purchase a hardware license, please contact sales@netburner.com

- No additional license is required to run NetBurner libraries and code on hardware purchased from NetBurner
- A hardware license is required to run NetBurner libraries and code on custom hardware
Please specify the directory where NetBurner NDK will be installed.

Installation Directory: C:\nburn
Install Serial to USB Driver

After the NNDK install runs, would you like to install the NetBurner Serial to USB Driver?

This driver must be installed the first time the NNDK tools are installed. This driver may require a computer reboot on completion. If you wish to install the driver at a later time, you will find the executable placed in C:\nburn\USBDriver

- Yes
- No
Please enter your NetBurner Network Development Kit (NNDK) installation key. It is located on the bright red card that came with your kit. If you cannot locate your card, your keys should be stored in your NetBurner support account at support.netburner.com. Example format: MOD5282:U8IS845YZU815Q

Problems:

1) NB Eclipse requires a 32-bit Java virtual machine. If you are using a 64-bit machine and get an error about a missing Java VM when you start NB Eclipse you may not have one installed. Download and install a 32-bit Java virtual machine. Edit the NB Eclipse.ini file in the C:\nburn\NB Eclipse directory. Add the following lines to the end of the file:

-vm
C:\Program Files (x86)\Java\jre1.8.0_161\bin\javaw.exe

The last line should be a valid path to the javaw.exe program.

2) If you are unable to create a new project in NB Eclipse, your workspace may not be writable. Try using a different workspace directory.
