Lecture 6
Quiz
1) If all of the $b_n$ (sine) coefficients in the trigonometric Fourier series are zero, the corresponding function is _______________.

(a) even (b) odd

2) The component functions in the trigonometric Fourier series are mutually ________________.

(a) hermitian (b) orthogonal
1) If all of the $b_n$ (sine) coefficients in the trigonometric Fourier series are zero, the corresponding function is ___________.

(a) even  (b) odd

2) The component functions in the trigonometric Fourier series are mutually _____________.

(a) hermitian  (b) orthogonal
