Lecture 15
Quiz
1) ________ noise has a constant power spectral density (PSD) function over all frequencies.
   (a) Pink  (b) White

2) As the number of bits used in quantization increases the signal-to-quantization noise ratio ________.
   (a) increases  (b) decreases
1) ________ noise has a constant power spectral density (PSD) function over all frequencies.

   (a) Pink                       (b) White

2) As the number of bits used in quantization increases the signal-to-quantization noise ratio _________.

   (a) increases                  (b) decreases
